

Senri Nakamura

Medford, MA | 781-539-3225 | senrinakamura60@gmail.com | SenriNakamura.xyz

EDUCATION

Tufts University

Medford, MA

Electrical Engineering GPA 3.5

Sep 2022 - Jun 2026

- Coursework: Real-Time Embedded Systems, Embedded Systems, Electronics I, Linear Systems, Intro Digital Logic

WORK EXPERIENCE

Recruit Holdings Co., Ltd.

Tokyo, JPN

Product Manager Intern

Jul 2024 - Aug 2024

- Delivered the **only Minimum Viable Product (MVP)** from the cohort to be greenlit for full-time development by leading the end-to-end product development process, including ideation, market research (100+ customer hearings), and design. Successfully advanced the MVP into the experimental phase and **secured executive buy-in**.
- Led a cross-functional team of 3 in developing an HR platform for the 50+ age segment, leveraging Recruit's "Ribbon Model" to tap into a **\$1 billion TAM** and **\$100 million SOM**.
- Conducted in-depth competitive analysis (**SWOT, competitor profiling**) and shaped the product roadmap through trend analysis and market research, positioning the product for significant market share growth.
- Leveraged agile methodologies (**Scrum, Kanban, sprint planning**) to iterate on the MVP.

Nano Lab - Tufts University

Medford, MA

Undergraduate Research Assistant

Apr 2023 - Sep 2023

- Examined the potential application of **triboelectric nanogenerators** and pressure sensors in analyzing natural contractions of the **gastrointestinal (GI) tract** using an **ingestible electromechanical pill**.

PROJECT EXPERIENCE

Tufts Solar Vehicle Project

Medford, MA

President

Aug 2024 - Present

- Led a team of **140+ members**, growing **team size by 1000%**, increasing **the operational capacity by 200%**.
- Directed the executive decisions on a **\$100K budget**, including the **BOM and Gantt chart**, synchronizing 15 sub-projects aimed at delivering **Tufts' first road-legal, race-competitive solar car** by March 2025.
- Achieved a **50% increase in funding** by securing an additional **\$50K**, bringing total **sponsor engagements to 45+**.

Co-Electrical Lead (Founding Member)

Sep 2023 - Jul 2024

- Created a **dual-function lamination and pre-shrinking machine** for 4x3 solar arrays of **95% alignment precision**.
- Reduced the cost of electrical infrastructure by **99.95%** by building EL-test setup, workspace stations in **4 months**.
- Led production of **4m² solar arrays (256 cells, 33 arrays)** with **75% quality** verified through **IV tracing**.

Automatic Soil Moisture Sensor w/ Audito Feedback

Medford, MA

Embedded Systems

Apr 2024 - May 2024

- Developed a real-time soil moisture monitoring system with auditory feedback, integrating a **capacitive moisture sensor**, high-resolution **ADC**, **UART** for serial communication and **I2C** on the **STM32L4** with the audio chip.

Pulse Oximeter Sensor w/ Feedback Control

Medford, MA

Electronics I

Apr 2024 - May 2024

- Developed a pulse oximeter incorporating a **MOSFET** for LED current control, a **Zener diode** for stable reference voltage, and **Band-pass filters** for signal processing to ensure accurate blood oxygen level (**SpO2**) readings.

SKILLS

Skills: Agile Project Management, MVP, C, C++, VHDL, EL-testing, Lamination, SWOT, Electrical Circuitry
